

Forlab - Bottom cabinets

COVERING TO THE FLOOR

Covering to the floor, height 50 mm

Covering to the floor, height 100 mm

- Finishing of the cabinets with plinth is a suitable solution for bottom cabinets and closets.
- The cabinet can be completed with plinth (height 100 mm), or can be established on the basic profile (50 mm) which is possible to cover by the flooring. Both variants are used not only for aesthetic function, which completes the design of the space, but also for practical function, which defends and covers hard-cleanable places.
