

## Partition panels

## **SURGICAL - BOTTOM MODULE**

Basic Surgical panels form the final surface of the entire partition system. The system is divided horizontally into three parts.

The bottom part is supplied in AISI 304 design or with thermosetting powder coat, colour upon request. The bottom field is supplied with a standard height of 950 mm.

The central removable part is typically distinguished by colour from the remaining fields, according to the colour layout of the entire area. The height of the central module is 1050 mm.

The upper module is mostly supplied with the same colour design as the suspended ceiling in operating theaters.

The distribution of the Surgical partition system is provided by BLOCK a.s ..
